Overview

This release of Endpoint Detection & Response (EDR) includes enhancements that strengthen detection, response, and therefore visibility of cyber, insider, and third-party threats using Behavioral Monitoring and Analysis (BMA), which leverages ClearSkies[™] advanced security analytics and threat intelligence.

What's New in v6.9.3

New features and enhancements are introduced in Endpoint Detection & Response (EDR) version 6.9.3, including:

- The agent now resends its details to the portal every time there are configuration changes.
- The endpoint now utilizes native operating system processes for seamless domain controller queries, replacing traditional PowerShell scripts.

Important Notes

No special considerations applicable to this version.

New Features

ClearSkies[™] Endpoint Detection and Response (EDR) is a comprehensive Endpoint Protection solution, fully integrated with ClearSkies[™] to complement the detection and response of cyber, insider and third-party threats by utilizing Behavioral Monitoring and Analysis (BMA) which leverages ClearSkies[™] advanced security analytics and Threat Intelligence.

Enhancements

- > The ClearSkies[™] Endpoint Detection & Response (EDR) Agent has now the ability, to resend the version and the policy from a workstation back to endpoint service, every time there is a change in host.
- ➤ The ClearSkies[™] Endpoint Detection & Response (EDR) Agent now uses native OS processes to query Domain Controllers instead of PowerShell scripts, effectively minimizing the security risk of the host.
