Overview

This version release of ClearSkies™ TDIR MSSP platform includes features and enhancements that empower MSSPs to provide top-quality, intelligent, reliable and efficient Managed Security Services that position them ahead of their competition.

What's New in v6.6.4

In ClearSkies™ TDIR platform version 6.6.4 we re-engineered the retrieval process of log and event data related to an incident raised to resolve the issue where on occasion log and event data related to a raised incident did not load.

Important Notes

No special considerations applicable for this version.

Bug fixes

This version resolves a number of stability and performance issues identified.

- Fixed a bug where, under certain circumstances, the log source tree in the Correlation page was empty.
- Fixed a bug where the user could add a Filter configuration without adding a Filter first.
- Various minor bug fixes.
