## Overview

This version release of ClearSkies™ MSSP TDIR platform includes bug fixes that empower organizations to enhance and streamline their cyber security posture while at the same focusing on main areas of concern, all towards achieving Cyber Resilience. For MSSPs, the enhancements offer them the capability to provide top-quality, intelligent, reliable, and efficient Managed Security Services that position them ahead of their competition.

Maximize the effectiveness of your security posture to achieve Cyber Resilience by taking advantage of the plethora of capabilities offered through a carefully selected set of diverse third party technologies/vendors that have been integrated into the ClearSkies™ MSSP TDIR platform, all conveniently offered through ClearSkies MSSP TDIR “Marketplace”.

By integrating your IT infrastructure, systems, applications, and security components with ClearSkies™ MSSP TDIR platform, you can now, exponentially enhance your visibility, detection, Investigation and response capabilities, vastly improving your organization’s security posture across your on-premises, or hybrid environments, enabling you to better protect your digital assets and data from evolving cyber threats.

The overriding benefits that can be achieved by utilizing ClearSkies™ MSSP TDIR platform’s integrated technologies’/vendors’ capabilities are:

- **Optimal Visibility:** Integrating other technologies/vendor components already part of your digital ecosystem with ClearSkies™ MSSP TDIR platform offers you a comprehensive and centralized view of your entire infrastructure. The integration empowers your security and IT teams to monitor and analyze security and performance related events and alerts across both on-premises and cloud-based digital eco-system environments. With this enhanced visibility, you can detect and respond to threats more effectively, leveraging ClearSkies™ MSSP TDIR platform’s superior console to streamline your security operations and ensure robust protection against evolving cyber threats.
- **Maximized Efficiency:** This strategy allows you to centrally manage log and event data from disparate sources. By centralizing management, you streamline your security operations, reducing both their complexity and resource intensity, and improve the overall efficiency of your security monitoring and incident response operations.
- **Compliance and Reporting:** Extends the built-in compliance management features and customizable reporting capabilities by aggregating log and event data from both environments, vastly simplifying cumbersome compliance audits and reporting processes.

## What's New in v6.6.7

### Important Notes

No special considerations applicable for this version.

### Bug fixes

This version resolves a number of stability and performance issues identified.

## Appendix A: New Supported Vendor/Products

| Vendor | Product       | Product Category    | Product Version <sup>5</sup> | Log Collection Method |
|--------|---------------|---------------------|------------------------------|-----------------------|
| ESET   | Protect Cloud | Endpoint Protection | 11.2                         | Syslog CEF            |
